

# Exclusive Interview with Rubesh Radhakrishnan

Posted by [daston](#) / 07 - Jul - 2019

Who is **Rubesh Radhakrishnan**?

The creator of Kuthustep, the young up-and-coming musical talent is already making waves in the Indian music industry with [A-Track \(Let Her Go\)](#) and [Adiyae Paathagathi](#). A current artist at [Pu4lyf](#), the 24-year-old is working on his new songs for the film *Yogi 2* that would be released sometime in August 2019. Rubesh has worked with celebrity singers Andrea Jeremiah, Rahul Nambiar, Senthildass, Priyanka and Chinna Ponnu. We got an exclusive interview with Rubesh Radhakrishnan as he shares his background, inspirations, future plans and maybe a little more.

**Daston:** Thank you so much for coming down to **TheGuruSG** to do this interview, you look sharp, smart and eager to start! Please introduce yourself.

**Rubesh R.:** I am a music composer/director and have done about three feature films. The third film (Malaysian feature) has yet to be released in theatres in this region. I am working on a fourth film right now. Aside from music, I can do colour grading, editing, aerial scenery photography and drone cinematography.

**Daston:** Wow, very impressive. What is your background?

**Rubesh R.:** Well, no one in my family is in or from the music industry. I'm the first person who has ventured into music as a career and I am enjoying every part of the process. My background is in Sound Engineering which helped a lot in my music career.

**Daston:** So who is the biggest inspiration for your music?

**Rubesh R.:** Coincidentally, the biggest inspiration for my music has to be *Yuvan Shankar Raja*! My style is similar to Yuvans- Very in tune with the current trends. His songs are some of the biggest influence on me. Songs by Yuvan in the films *Sandakozhi 2* and *Taramani* has had a huge impact on my style as well as his songs from the 2004/2005 years.

*Daston:* Cool, It's really nice to draw inspiration from the big names of the industry. I heard of your future plans, tell us about it.

**Rubesh R.:** Right, future plans are to make more music videos, singles and music for feature films. On top of that, I want to make new music genres. I have made Kuthustep when I did the Malaysian movie *Biishman*. It's a combination of Kuthu meaning Tamil folk and step from dubstep to make Kuthustep.

*Daston:* If Kuthustep catches on, It will be a household genre for the club scene.

**Rubesh R.:** For sure! Like how Koreans invented K-Pop and made it super popular, I'm into mixing Indian elements with the existing music genres to create a completely new one. Yuvan has done that to some extent.

*Daston:* I wish you the very best on your musical journey and once more, Thanks so much for doing this interview!

**Rubesh R.:** Thanks for having me!
